

DENON®

REAL HI-FI FOR TODAY'S LIFESTYLES.

The Denon Design Series.

ORIGINATING
FROM 100 YEARS
OF PRECISE AUDIO
REPRODUCTION.

DRA-100 The Network Receiver.
DCD-50 The CD-Player.
PMA-50 The Amplifier.

For more than a century, we've been very serious about engineering the perfect sound – that's why, in the early years, we called our Hi-Fi products "precision audio components". And our approach hasn't changed since: it's all about performance. With this in mind, we decided that, though our latest products should be compact, and with remarkably sleek styling, they should be true high fidelity components. In other words, they should be totally Denon. **Introducing the Denon Design Series: Real Hi-Fi For Today's Lifestyles.**

TOTAL
DIGITAL
DESIGN.

PMA-50 The Amplifier.

The PMA-50 amplifier delivers true Denon sound, with outstanding performance despite its compact size. And it does so using Denon technology developed over many years, such as the Advanced AL32 audio processing it uses to turn digital data into beautiful music. With analogue and digital connectivity as well as Bluetooth®, audio streaming from your computer or a portable device is a piece of cake. And if you're keen on high-resolution audio, this amp will be your perfect choice because of its USB-B input. Its 50W per channel output makes it suitable for a wide range of speaker types. Its compact design allows it to fit in limited spaces and you can even place the PMA-50 vertically – the orientation of the OLED display will adjust accordingly.

**SPINNING
ON THE TOP
LEVEL.**

DCD-50 The CD-Player.

The DCD-50's high-performance D/A conversion delivers a wide dynamic range, brought to the analogue outputs via precision tuned low-noise, low distortion circuitry. And it does all this not just with your favourite CDs, but also with MP3/WMA tracks stored on data CDs. However you like your music, the DCD-50 is ready to deliver. With just one handset, you can control the DCD-50 and PMA-50 for seamless operation, whether it's playing your discs or dimming the display a little to match your mood. The Design Series puts all your entertainment at your fingertips. And like its perfect companion, the PMA-50, you can place it as well horizontally as vertically. That's what we call a smart design.

**A MASTERPIECE
FOR STREAMING.**

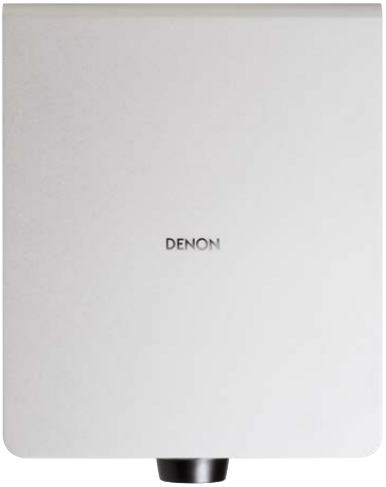

DRA-100 The Network Receiver.

Setting the style for the future of music: that's the Denon DRA-100. With Bluetooth®, built-in AirPlay, Internet Radio, Network Audio Streaming and Spotify Connect, the DRA-100 is designed to be the centre of all your listening. At its heart, the DRA-100 is pure class, combining Advanced AL32 processing and Direct Digital Feedback Amplifier (DDFA) technology to ensure flawless reproduction from any source. It's all about bringing you the best possible listening experience, so the DRA-100 even handles high-resolution audio tracks way beyond CD quality. With powerful 70 W per channel amplification and premium grade speaker connectors, it's able to drive even demanding speakers, meaning the DRA-100 is all you need for total entertainment.

**PURE CLASS
ELEGANTLY
DESIGNED.**

DESIGN SERIES The Deluxe Finish.

The Denon Design Series stands out, thanks to its combination of soft-look aluminium, bright silver tone accents and a mixture of glossy and matt black surfaces. Crisp OLED displays tell you all you need to know at a glance, using icons and text. And the PMA-50 and DCD-50 make a real statement also when used horizontally or vertically.

DESIGN SERIES The Compact Style.

The Design Series is all about superb sound – and maximum style. Only with Denon’s sophisticated digital technology, and over a century of audio engineering expertise, has it been possible to combine all that performance with a compact and truly unique design. Look at the Design Series, and you’ll agree it lacks nothing, combining beauty and performance. Listen to the Design Series, and prepare to be amazed. **That’s the Denon Design Series: Real Hi-Fi For Today’s Lifestyles.**

PMA-50 The Amplifier.

High quality sounding Stereo Amplifier // USB-B DAC for Computer-Direct connectivity and high-resolution audio reproduction // Digital optical / coaxial and analogue inputs // Bluetooth® aptX® Low Latency CD quality wireless streaming with NFC pairing // 50 W per channel (4 ohms) Direct Digital Feedback Amplifier (DDFA) // Advanced AL32 Processing // Subwoofer pre-output for system expansion // Dedicated headphone amplifier circuit // Horizontal or vertical placement with rotating display // Easy-to-use remote control // Auto Standby and low power consumption at standby // Maximum Dimensions (W x D x H) in mm 200 x 240 x 86 // Weight kg 2.5

Bluetooth®

ADVANCED *AL32* PROCESSING

DCD-50 The CD-Player.

High quality CD Transporter/Player, best matching with Denon PMA-50 // Slot-in CD mechanism, supporting CD audio and MP3 / WMA discs // Digital Coaxial output // 192 kHz / 32-bit D/A converter with analogue output (RCA) // High-grade audio components // Horizontal or vertical placement with rotating display // Easy-to-use remote control // Auto Standby and low power consumption at standby // Maximum Dimensions (W x D x H) in mm 200 x 240 x 86 // Weight kg 2.4

DRA-100 The Network Receiver.

Fully digital Hi-Fi Stereo Network Receiver in an aluminum cabinet // Denon's award winning sound technology including Advanced AL32 Processing // Master Clock Design // Direct Digital Feedback Amplifier (DDFA) // 2 x 70 W (4 ohms) // Built-in Wi-Fi and Bluetooth® // Supports Internet Radio, Apple AirPlay streaming and Spotify Connect // Easy control via Denon Hi-Fi Remote App // Supports Hi-res Audio (WAV, FLAC, AIFF 192 kHz / 24-bit, ALAC, DSD 2.8/5.6 MHz) over DLNA // Two optical and one coaxial digital inputs for connectivity of external devices // Front USB-A input for iDevices and USB Mass Storage Devices (supporting WMA, MP3, AAC, WAV 192/24, FLAC 192/24, AIFF 192/24, ALAC, DSD 2.8 / 5.6 MHz) // Auto Standby and low power consumption at standby // Maximum Dimensions (W x D x H) in mm 280 x 332 x 160 // Weight kg 4.8
