## LINDEMANN LIMETREE. THE BEST OF 25 YEARS.

The Limetree series is designed and manufactured in Germany by an expert team around Norbert Lindemann. Driven by the passion for excellent sound quality, we have perfected every component down to the last detail. Whether analog or digital.

Experience unforgettable moments.  
Meet your favorite model now.

**DESIGNED & MADE  
IN GERMANY.**

## Limetree Phono

- All-purpose phono preamplifier with separate inputs for MM and MC.
- Easy installation. Fixed impedance for MM plus variable impedance for MC.
- Excellent measurement engineering. Very low noise and distortion values.
- Professional studio technology amplifier modules. Ultra-low noise power supply.
- Open, detailed and natural sound.

## Limetree Headphone

- High-grade headphone amp which can also be used as an exquisite preamp.
- 3 switchable inputs, 1 line output e. g. for active loudspeakers.
- Current driven class-A circuitry for excellent sound.
- High-class analog volume control provided by MUSES 72320.
- Extremely clean power supply with <math><10\ \mu\text{V}</math> noise.

## Limetree USB-DAC

- Uncompromisingly sound-optimized USB-DAC for music playback from a computer.
- Select between bit-perfect reproduction or 1-bit re-sampling up to DSD 256.
- Max. resolution of 24 bits and 384 kHz or DSD 256.
- AK4493 converter module for resolution, pure sound and musicality.
- Dual MEMS – FemtoClock ensures ultimate jitter performance.

## Limetree Network

- Network player for high-res playback up to 384 kHz and DSD 256.
- LAN, WLAN, Bluetooth, ROON ready.
- Music from UPnP/DLNA servers, USB sticks and hard disks.
- Online streaming: TIDAL, Spotify, Qobuz, Deezer, Highresaudio, web radio and podcast.
- Mono-mode DACs, high-quality headphone output, line output.

## Limetree Bridge

- Network bridge for high-res playback up to 384 kHz and DSD 256.
- LAN, WLAN, Bluetooth, ROON ready.
- Music from UPnP/DLNA servers, USB sticks and hard disks.
- Online streaming: TIDAL, Spotify, Qobuz, Deezer, Highresaudio, web radio and podcast.
- Ultra low-jitter digital output for external D/A-converters based on FemtoClock precision.

AFFORDABLE HIGH-END  
MADE IN GERMANY.
